All-in-One ADSL2+ Router with Wireless-N technology

The BiPAC 7800NL is an ADSL2+ Router that offers users affordable expanded wireless coverage and speedy Internet connection. By supporting Internet Protocol, IPv6, this All-in-One Router allows users to make internet connections between existing IPv4 networks and future IPv6 network upgrades when greater security, high quality QoS and larger addressing are required. With an integrated 802.11n Access Point, the BiPAC 7800NL can automatically adopt an optimal connection to deliver smooth, constant signal reception even if obstacles are present. Robust Firewall security is featured to protect Internet access against hacker attacks. The Quality of Service and VLAN enables intelligent steaming for HD video or multiple applications such as music downloads, online gaming, video streaming and file sharing simultaneously.

Optimal Wireless Speeds and Coverage
With an integrated 802.11n Wireless Access Point, this router supports a data rates up to 300Mbps and delivers up to 6 times the speed and 3 times the wireless coverage of an 802.11b/g network device. If the network requires wider coverage, the built-in Wireless Distribution System (WDS) repeater function allows users to expand the wireless network without the need for any external wires or cables.

Jitter-free, Reliable Net Traffic
Quality of Service (QoS) gives full control over outgoing data traffic. Priority can be assigned by the router to ensure that important transmissions like gaming packets, VoIP calls or IPTV / streaming content passes through the router at lightning speed, even when there is heavy Internet traffic. The transfer speed of different types of outgoing data passing through the router is also controlled to ensure that users do not saturate bandwidth with their browsing activities. The VLAN support is also capable of establishing reliable high-speed transmissions for wide bandwidth applications such as IPTV, VOD, or online gaming without consuming bandwidth.
High-speed Internet Access
The BiPAC 7800NL is compliant with worldwide ADSL standards, and supports download rates of up to 12 / 24Mbps using ADSL2 / 2+, 8Mbps using ADSL and an upload rate of up to 1Mbps. The integrated Annex M standard supports ADSL2 / 2+ for higher uploads by doubling the upload data rate. The 4-port Ethernet Switch incorporated into the BiPAC 7800NL enables users to connect to multiple computers or wired-Ethernet devices easily and enjoy blistering LAN transmission for multimedia applications such as interactive gaming, IPTV video streaming and real-time audio.
Simple Setup, Ease of Management
Easy Sign-On (EZSO), WPS push button and Auto-scan ADSL settings allow users to manage the device functions effortlessly! The user-friendly, web-based user interface makes installing and managing the BiPAC 7800NL extremely easy. With support for both DHCP client and server, system administrators can manage IP assignment without having to reconfigure other stations and fitting the router into existing network environments.
